Rob:

I am now here at AEG and will be managing this site with Mike. Glad to see you are still at EPA. Feel free to contact me. We will be scheduling the next monitoring event at Toppenish for the first part of May. I am not sure of the date yet but will keep you informed. Are you wanting to be present for that sampling? Feel free to contact me.

Sue:

I am glad to be working with you again. I will be working on this project and will be getting up to speed with the recent activities at the site. I will be looking into the MW-4 issue. Let's see what the next round of sampling shows. If I remember correctly, you had a concern about this area of the site a few years ago.

I will also be working on the Kennewick (Garfield) site. What goes around comes around. If you have any questions, you can call Mike or me. I will be handling the technical issues and overall oversight. Mike will be dealing with the other things.

Thank you

Hi Michael:

Just checking in to see when the next Smitty's monitoring event is scheduled for?

Thanks

Rob

Yen-Vy,

Sorry about waiting till your last day but the numbers we have been getting out of MW 4 (MW 2) are bothering me. It started out basically unaffected and now has high concentrations. Does anyone remember my concerns about the big spills which occurred west of our property and as far as I know, has never been investigated? Could it now be reaching us? Are the 2011 results the first we have for that well? Can't remember when it was installed.
